-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 7 recites the limitation "the lower surface" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Parvulescu et al. (6,127,636).

Parvulescu et al. teaches a switch device (please refer to fig. 1 attached) comprising:
an operating member 10 having a cam section 14 (comprising of 14 and 16) with protruding portion 28 (comprising of 28 and 34);
a plurality of switches 44 and 46 to engage the cam section;
a detecting section (col. 1, lines 1-25; switch device is employed in a cell phone device) connected to the switches for position detecting;

Art Unit: 2832

the operating member is rotatable and/or movable;

the device includes a plurality of protruding portions;

the operating member 10 includes a knob 12 for operating the cam section and a coupling section (coupled by 18, in fig. 1) for coupling the knob and the cam; and

the operating member 10 includes a cam section 14 on the lower surface (please refer to fig. 1 attached).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Parvulescu et al. in view of Wermelinger (4,405,842).

Parvulescu et al. teaches the claimed invention except for the knob having a cam section on an inner surface for operating the cam section.

Wermelinger teaches a switch device having a knob 35 with the cam section 37 on an inner surface. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the switch device of Parvulescu et al. with inner cam section as taught by Wermelinger, since the inner cam section of Wermelinger would seal the cam device and the switch within.
